

## Textiles with double protection

*[ Sales arguments Benefits of flame retardant antimicrobial fabrics ]*

- Has a permanent antimicrobial effect without additional finishing agents
- Agent cannot be washed out, since integrated into fibre
- Minimises the risk of transferring bacteria
- Antimicrobial effect certified by Hohenstein Institute
- Satisfies highest hygienic demands
- Resistant to all methods of disinfection
- Easy care, hardwearing, low-crease and dimensionally stable
- Short wash cycles at low temperatures save water, detergent and energy
- High colour brilliance and fastness to light
- Does not decay or mould
- High resistance to abrasion
- Flame retardant Trevira fibre and filament yarns are free of toxic substances (certified to Oekotex Standard 100)
- Meets all important international fire protection standards e.g. DIN 4102 Part 1/B1; OENORM 3820/B1, NF P 92501-7/M1; BS 5867, Part 2 Type C; UNI VF 8456/I; UNE 23721-27/M1 and EN 1021 Part I 1 + 2
- No after-glow and only very slight development of fumes in the event of fire
- Supported by general test certification
- Safe due to trademark testing and approval
- Wide range of products, many applications possible: curtains, drapes, bedding, roller and vertical blinds, room dividers, upholstery materials, wall coverings
- Great variety of applications in contract and private sectors possible
